Chapter No. 1 Numbers up to 20.   **Class: I**

_____

Ones and Tens

Ones (O):

- Numbers **1 to 9** have only one digit, so they are called one- digit numbers. We need only one place to write them. This place is called **Ones (O)** place.
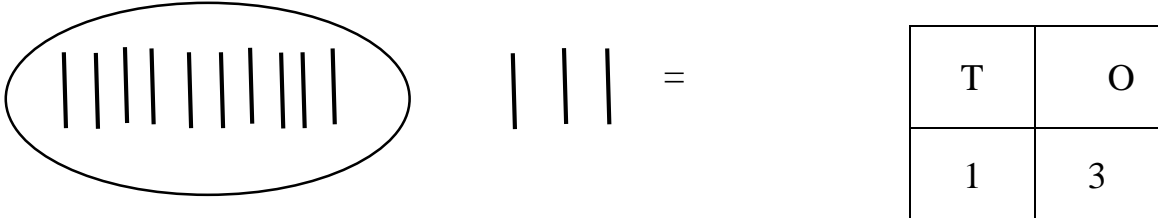

Tens (T):

T	O
1	0

- Number **10** has two digits, so it is called a two-digit number. We need two places to write it.

- The place on the right is called **Ones (O)** place, while on the left is called **tens (T)** place.

In above example, the number 10, **0** is at the ones place and 1 is at the tens place.
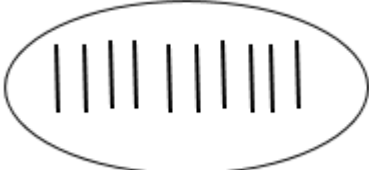

Problems:

1. Counting in Tens and Ones.

Eg:

T	O
1	3

1 ten   and   3 one   make   **thirteen** | 13 |

1.

|||||||||| ||||||| =

T	O
1	7

1 ten   and   7 one   make   **Seventeen**   17

2.

||||||||| | =

T	O
1	1

1 ten   and   1 one   make   **Eleven**   11
